DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by del Castillo et al (US Patent 6,539,207).

Castillo et al disclose, in figure 1, a built-in antenna comprising a signal end or radiating element 84, a metal shell 42 of an electronic communication device 10 which is used as a ground end of the built-in antenna and is parallel to the radiating element 84, and a coaxial cable having a negative electrode coupled to the ground end and a positive electrode coupled to the radiating element, see figure 3.

Allowable Subject Matter

Claims 2-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The patents to Hines, Honda et al, and Utsumi et al are cited as of interest showing the antenna similar to that disclosed.
